

"JIX" WATCHES THE COMMUNISTS.

Activities Against Britain.

WILL SEEK POWERS IF NECESSARY.

The anti-British activities of Communist agitators in this country are being closely watched, Sir William Joynson-Hicks (Home Secretary) said today at the House of Commons yesterday.

Sir WILLIAM JOYNSON-HICKS informed Mr. Clarry (C. Newport) that he was directing his constant attention to anti-British activities in this country of certain Communist agitators.

Mr. CLARRY: Is the right hon. gentleman satisfied with the powers he has to deal with this menace?

Sir WILLIAM JOYNSON-HICKS: If I were not satisfied, it would be my duty to ask for more powers. I am keeping a close eye on the matter, and, if necessary, I shall ask for further powers.

Discussion on Russia.

Mr. RAMSAY MACDONALD said: "Has the Government made up its mind when it is going to give a day for discussion on Russia?"

Commander FVRS-MONSELL (Parliamentary Secretary, Treasury): A day has not yet been fixed.

"Jix" and M. Stabin. Mr. MOSLEY (St. Southwick) asked the Home Secretary on how many occasions he had interviewed the Home Secretary (St. Southwick), and whether the interviews related to the affairs of the Home Secretary.

Sir WILLIAM JOYNSON-HICKS: It was not as one met Mr. Stabin in a private house. Mr. Stabin had been seen by his secretaries at the Home Office.

Mr. MOSLEY: Is it the policy of the Government to permit a Russian man to come to this country to give a lecture on the subject of Communism?

Sir WILLIAM JOYNSON-HICKS: It is the policy of the Government to permit a Russian man to come to this country to give a lecture on the subject of Communism, and I can give you the names of those who have done so.

Mr. MOSLEY: Is it the policy of the Government to permit a Russian man to come to this country to give a lecture on the subject of Communism, and I can give you the names of those who have done so.

Sir WILLIAM JOYNSON-HICKS: It is the policy of the Government to permit a Russian man to come to this country to give a lecture on the subject of Communism, and I can give you the names of those who have done so.

Mr. MOSLEY: Is it the policy of the Government to permit a Russian man to come to this country to give a lecture on the subject of Communism, and I can give you the names of those who have done so.

Sir WILLIAM JOYNSON-HICKS: It is the policy of the Government to permit a Russian man to come to this country to give a lecture on the subject of Communism, and I can give you the names of those who have done so.

Mr. MOSLEY: Is it the policy of the Government to permit a Russian man to come to this country to give a lecture on the subject of Communism, and I can give you the names of those who have done so.

FRENCH PLAYS TOO IMPROPER—

SO A LEEDS MAN WRITES ONE.

DAUGHTER TO PLAY THE LEAD.

A play written in French by Mr. J. A. Munday, of Headingly, has been added to the literary achievements of Leeds.

It is a comedy of two acts, requiring a little less than an hour in which to be acted. It will be produced in the Lecture Room of the Y.M.C.A., Atholplace, Leeds, to-morrow evening before members of the Leeds Polyglot Society and their friends.

Mr. Munday is very modest about his work, and says it is quite an unambitious effort.

"I wrote it specially for the French section of the Polyglot Society, who have a dramatic evening every season," he says. "You see, it is difficult to find French plays for these occasions, and my little play is neither improper nor—I hope—dull."

Prizes for French. Mr. Munday is president of the French section of the Polyglot Society, and a vice-president, Mademoiselle M. C. Mademoiselle M. C.

There are only four characters, and Mr. Munday's daughter, Miss Rosemary K. Munday, will play the lead. She receives to-day half of the prize awarded by the London Chamber of Commerce to the person whose results in their advanced commercial French examinations are the best in the United Kingdom. This prize has been awarded jointly this year.

The production of the comedy will be the first of the kind in Leeds. It is a comedy of two acts, requiring a little less than an hour in which to be acted. SILENT HAN, GLASP OVER THE POLE.

How Amundsen Triumphed.

3 FLAGS PLANTED.

His Story of Peril on Roof of the World.

"Ready with the flags," "Ruser-Larsen knelt and through the open window followed the sun with his sextant."

"Now we are there."

"There" was the North Pole, and the incident occurred when the Norwegian explorer, Roald Amundsen, and his companions in the airship, Norge, passed over the "roof of the world" during their flight from Europe to America in May, 1926.

The account of the voyage and what it revealed to the world for the first time in detail in "The First Flight Across the Polar Sea," by Roald Amundsen and Lincoln Ellsworth (Hutchinson and Company, 21s.).

A number of photographs, not previously published, illustrate the text.

The Great Moment. Continuing their description of the authors' voyage, the book tells of the flight of the airship, Norge, which was piloted by Amundsen and Ellsworth, and which was accompanied by the Norwegian explorer, Roald Amundsen, and his companions in the airship, Norge, during their flight from Europe to America in May, 1926.

DO YOU KEEP FOOD CLEAN AT HOME?

DOCTOR ON THE WAY TO SAFEGUARD IT.

TINNED GOODS WITH NO DANGER.

By a "Mercury" Special Correspondent. Since Monday I have been keeping my eyes open for any improvement in the quality of food which may have been brought about by the disclosures already made about dirty food. If there are any, they are very hard to find.

Food is still lying on counters exposed to every kind of germ. Men still expectorate in places where it is essential that the prohibition of this habit should be rigidly enforced.

I have obtained statements from well-known doctors in Leeds, who are unanimous in upholding the efforts of "The Leeds Mercury" to obviate a very real danger to the health of the community.

Dr. C. H. Moorhouse, a former chairman of the Leeds Health Committee, said yesterday: "I feel very strongly on the question of keeping the people's food clean and wholesome, and will gladly do all I can to further such a cause."

In the Home. "It is of the utmost importance that food should be clean and safe from contamination and consequent germs. This applies in the shops and in the home, even when there is no definite disease about, such as tuberculosis, the danger becomes not possible, but positive."

"In the home food should always be kept in the larder, covered up, and not left about on the table any longer than necessary. Jam, meat, bread, and sweetstuffs should be especially protected from their attraction for flies."

Milk is particularly liable to infection from the atmosphere, and the milk canister it should be carefully cleaned with hot water after use, and the sinner this is done the more easily will it be clean.

Common Sense. "This is all merely common sense, of course, but how many people completely disregard these common sense suggestions which are offered for sale, and the apparent difficulty of doing so, seems quite possible. It is not the tables any longer, especially as the danger from this kind of food has practically disappeared to vanishing point."

Something should be done. You cannot have a healthy nation fed on garbage."

A GREAT MYSTERY SERIAL. CHAPTER XII.—Continued. Made Ready For Destruction.

R. HALLIEY left the window open. He advanced a few paces, and then stood in the darkness listening. The old house seemed to be absolutely quiet; so quiet indeed that the sound of an owl in the garden outside made him start. He came very carefully to the door and listened for a moment. He heard the faint sound of a door opening, and he turned the handle of the door and stepped out.

He stepped out into the night, and he felt a cold breeze on his face. He looked back at the house, and he saw a light in the window. He turned the handle of the door and stepped out.
